

CISCO Jabber: Merging Calls

From Jabber, call the first participant by entering dial string and clicking **green** phone icon.

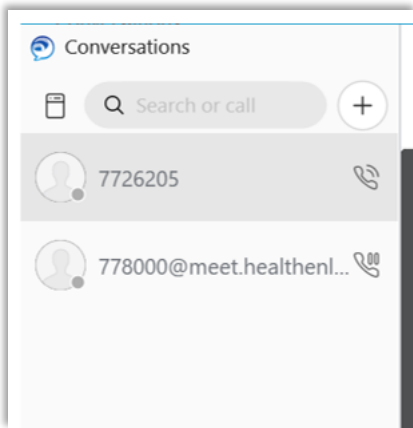

Once connected to first participant, return to Jabber main screen and enter the dial string for the next participant. Click on the **green** phone icon.

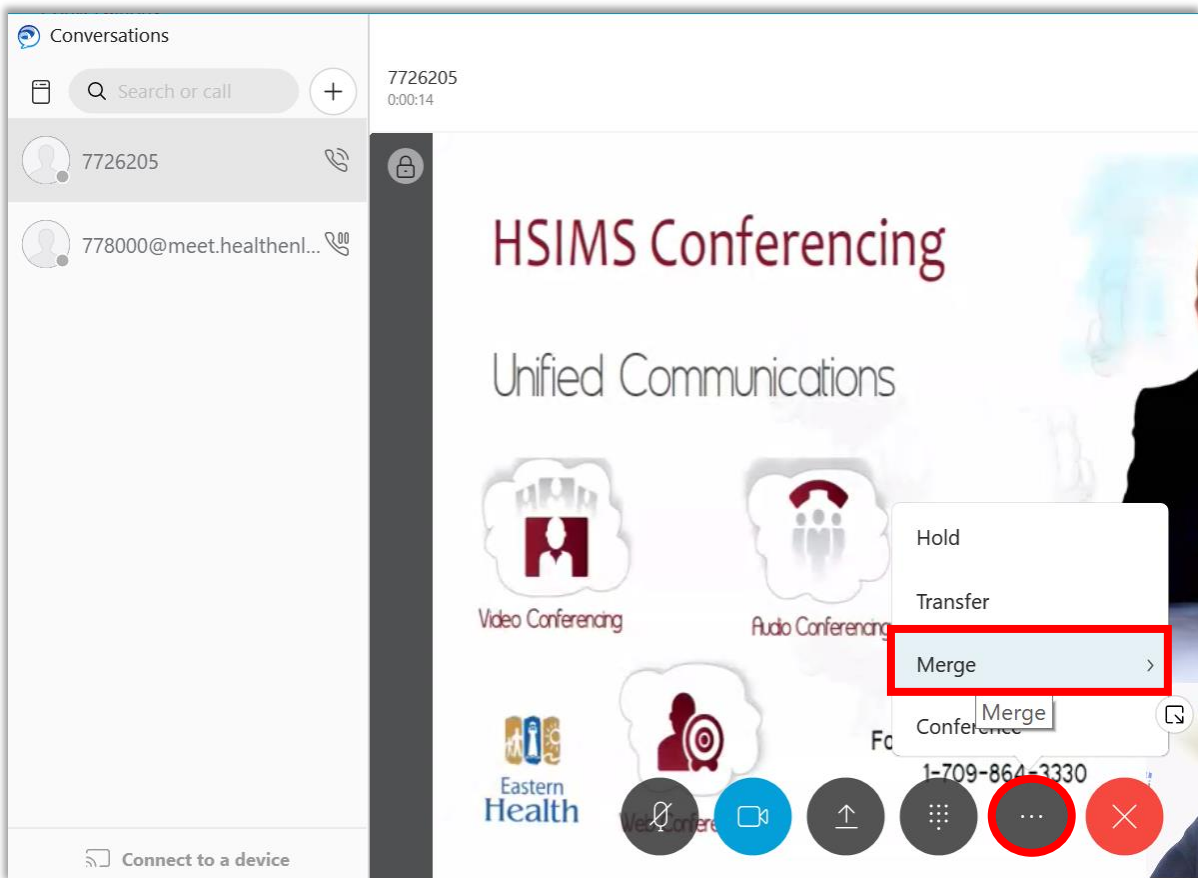

Merging Calls in Cisco Jabber

At this time, you will have two separate Jabber calls open.

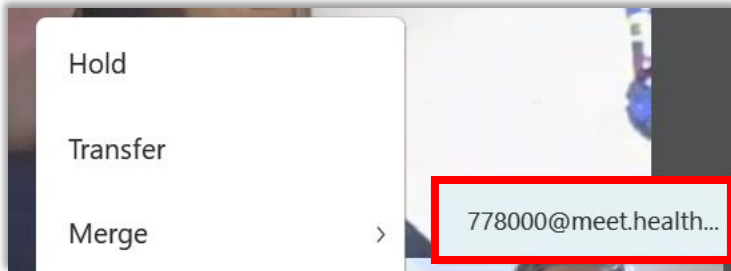

To merge these two calls, click the three horizontal dots in the options menu (see below). A pop box will appear. Click **'Merge'**.

Merging Calls in Cisco Jabber

When you click 'Merge', you will see the other open call. Click the call you want to Merge with your current call.

You will then have three participants in the same call. You can continue to Merge participants into the call as desired by repeating this process.
